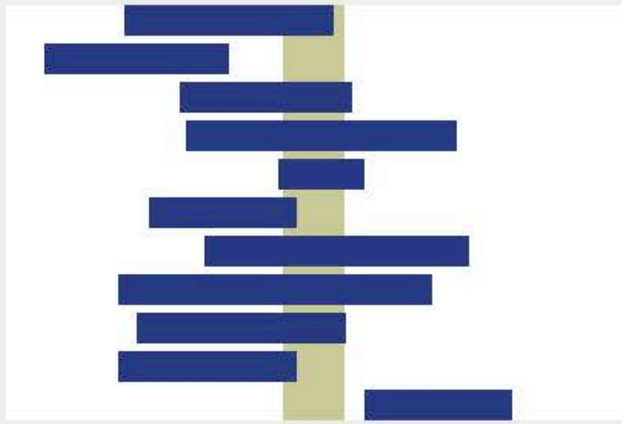
Gynecologic, Pregnancy & Childbirth			
General Principles			
Behavioral & Mental Disorders			



- The content presented in this simulated examination is provided by UWorld for educational purposes only.
- This assessment tool is not intended to predict a participant's performance on the actual USMLE™, but is designed to help one assess relative strengths and weaknesses in different subjects and systems.
- Your performance is plotted on a scale of 200 to 800. The shaded region indicates the border line performance. Performance bands in subjects and systems indicate relative strengths and weaknesses, while the width of a band reflects the consistency of performance in a subject/system. A narrow band indicates consistent performance, while a wide band is suggestive of inconsistent performance.
- * The Assessment Score is calculated by UWorld and is based on its proprietary algorithm.
- ** The 3 Digit Score is calculated based on UWorld historical data. This is not intended to predict your performance on the actual USMLE™.
