EXAMINEE PERFORMANCE REPORT

ID: SMUA003541

Name: Kazim Sabiha

166050 - Medical U of the Americas - Nevis

Total Equated Percent Correct Score: 57

Test Date: October 24, 2022

Interpreting Your Content Area Results:

- **Your equated percent correct (EPC) scores** indicate the percentage of the content that you have mastered. EPC scores are statistically adjusted to account for slight variations in exam form difficulty and may be slightly lower or higher than the actual percentage of questions you answered correctly on this specific exam form.
- **Your total EPC score is the best available estimate of your performance on this exam**, but all scores have some amount of imprecision. If you tested again without learning or forgetting anything, your total EPC score would fall within 5 points of your current score two-thirds of the time.
- **The comparison group average EPC score** for this exam represents the performance of first-time takers from LCME-accredited medical schools who tested with standard timing, between 08/01/2020 and 07/31/2021, at the end of a clerkship. For recent administrations, the total EPC score mean and standard deviation for this group were 75 and 9, respectively.
- **The green boxes** indicate whether your performance was statistically lower, about the same, or statistically higher than the performance of the comparison group after taking into account the precision of each content area score. Content area EPC scores are less precise than total test EPC scores, so small differences in content area scores should not be overinterpreted.
- **You may use this report to identify areas of strength and weakness.** Keep in mind that some content areas are more difficult than others, and some comprise larger portions of the exam. The percentage of questions for each area may not add up to 100%.

Performance by Organ System/Topic	Your EPC Score	Comparison Group Average EPC Score	Score Comparison:			% of Questions
			Lower	Same	Higher	
Immune System and Blood and Lymphoreticular System	67	78				8 - 9%
Cardiovascular System	47	72				12%
Respiratory System	53	72				10 - 11%
Gastrointestinal System	52	74				10 - 11%
Female & Male Reproductive Systems, and Endocrine System	80	74				8 - 9%
Diseases of Skin and the Nervous and Musculoskeletal Systems	69	74				12 - 16%
