NBME® Comprehensive Clinical Science Self-Assessment (CCSSA) Score Report

NAME: Chen, Jennifer

TEST DATE: 8/31/2022

Your Performance

Assessment Score: 218

Your Performance Compared to Step 2 CK Examinees

The chart below represents the distribution of scores for recent examinees from US and Canadian medical schools taking Step 2 CK for the first time. Reported Step 2 CK scores range from 1-300 with a mean of 245 and a standard deviation of 15.

Because the Comprehensive Clinical Science Self-Assessment (CCSSA) and United States Medical Licensing Examination® (USMLE®) Step 2 CK cover very similar content, CCSSA performance can be used in conjunction with other information to assess readiness for Step 2 CK. Your CCSSA score represents an estimate of your performance on the USMLE Step 2 CK if you had taken both exams under the same conditions and with the same level of knowledge. Estimated performance based on taking CCSSA is not a guarantee of your future performance on Step 2 CK. Many factors, including changing levels of knowledge and testing conditions, may result in a Step 2 CK score that is higher or lower than your estimated score.

We anticipate that your actual performance on Step 2 CK will fall in the range from 213-241 about two-thirds of the time. This range is based on students who took CCSSA within one week before taking Step 2 CK.

A PDF version of your score report will be available within 4 hours of completing your exam. There may be longer delays during maintenance periods. To review your score before then, log in to MyNBME, click on the registration ID associated with this assessment, then click Review Your Results Interactively.

Your Strengths and Weaknesses

The boxes below indicate areas of relatively lower or higher performance in each content area within this examination. The percentage range of items in each content area on CCSSA is indicated below. This information can be used to identify areas of strength and weakness to guide future study. Because the exam is highly integrative, NBME recommends reviewing all content areas if retaking the test.

Strengths and Weaknesses Relative to Your Overall Performance on this exam: An orange box in the "Higher" column indicates that your performance in that area was higher than your overall examination performance shown on page 1. An orange box in the "Same" column indicates that your performance in that area was similar to or the same as your overall examination performance. An orange box in the "Lower" column indicates that your performance in that area was lower than your overall examination performance.

Strengths and Weaknesses Relative to a Step 2 CK Comparison Group: A blue box in the "Higher" column indicates that your performance in that area was higher than the average performance of recent examinees from US and Canadian medical schools taking Step 2 CK for the first time (comparison group). A blue box in the "Average" column indicates that your performance in that area was average relative to the performance of the comparison group. A blue box in the "Lower" column indicates that your performance in that area was lower than the average performance of the comparison group.

Performance by Physician Task

	(% Items Per Test)	Lower, Same, Higher than Your Overall Performance			Lower, Average, Higher than Comparison Group		
		Lo	S	Hi	Lo	Av	Hi
PC: Diagnosis	(44-50%)						
PC: Pharmacotherapy, Intervention & Management	(33-40%)						
PC: Health Maint, Prevention & Surveillance	(9-9%)
