Dear Dr. Ishola:

I regret to inform you that you did not pass your 2024 Internal Medicine Certification Examination.

I'm sure that this result is disappointing, and I encourage you to review the attached Score Report carefully. The Score Report will provide you with details about your exam performance and can help you identify content areas on which to focus for future learning.

You should also be aware of ABIM's [Board Eligibility policy](#) that may restrict your ability to take the exam again. To find out whether you are eligible to apply for the next administration of the Internal Medicine Certification Examination, view the "My Exams" section of your ABIM Physician Portal.

If you have questions, please call 1-800-441-ABIM (2246), Mon. - Fri., 8:30 a.m. to 6:00 p.m. ET, or [contact us by email](#).

Respectfully,

Furman S. McDonald, MD, MPH

INTERPRETATION OF OVERALL PERFORMANCE

The American Board of Internal Medicine Internal Medicine Initial Certification Examination is a standardized test that ensures all examinees experience the same level of difficulty to successfully complete the exam. Overall performance is reported on a standardized scale ranging from 200 to 800 points. Your performance on the entire exam determines the exam pass-fail decision. To pass the exam, your standardized score must equal or exceed the **standardized passing score** of 371. The links below provide more information related to understanding your overall performance.

YOUR OVERALL PERFORMANCE

The graph below shows your performance relative to both the standardized passing score and to a reference group of first-time taker examinees who took this exam in recent years. Because the reference group includes data from multiple administrations, you cannot accurately infer specific overall pass rates for this administration of this exam from this report. More information on specific annual [exam pass rates](#) is available on [abim.org](#).

YOUR PERFORMANCE BY MEDICAL CONTENT AREAS

The table below is an overview of your relative strengths and weaknesses in the medical content areas as assessed by your performance on the exam. Your standardized score in each medical content area is reported in standard deviation units above and below the reference group average (vertical dotted line). Due to the limited number of questions in each content area, content area subscores are less precise than the overall score. Narrower boxes indicate a greater level of precision in calculating your score. Because the overall score and the content area subscores are on different scales, they cannot be directly compared. Also provided on the following pages is a detailed listing of exam content, showing the blueprint content description and cognitive task that you missed in each area.

Cardiovascular Disease

BLUEPRINT DESCRIPTION	TASK
Pericardial disease Constrictive pericarditis	Diagnosis

RESCORE INFORMATION

ABIM's scoring process is a meticulous one and includes a rigorous set of quality control steps to verify the accuracy of results for every examinee. We have taken all the appropriate steps to verify the accuracy of your results. It is very unlikely that an error occurred in retrieving your answers from the computer or scoring your exam. However, you may request a rescore for a fee of \$250. Bear in mind that given the quality controls in the scoring process, a rescore is unlikely to change the outcome of your exam results. [See additional information on how exams are scored, including the rescoring process.](#)
